Real Time Analitik Lalu Lintas Berbasis
Computer Vision dan Lambda
Architecture

Background

Subject

Arus kendaraan di persimpangan & titik jalan raya via kamera CCTV

Problem

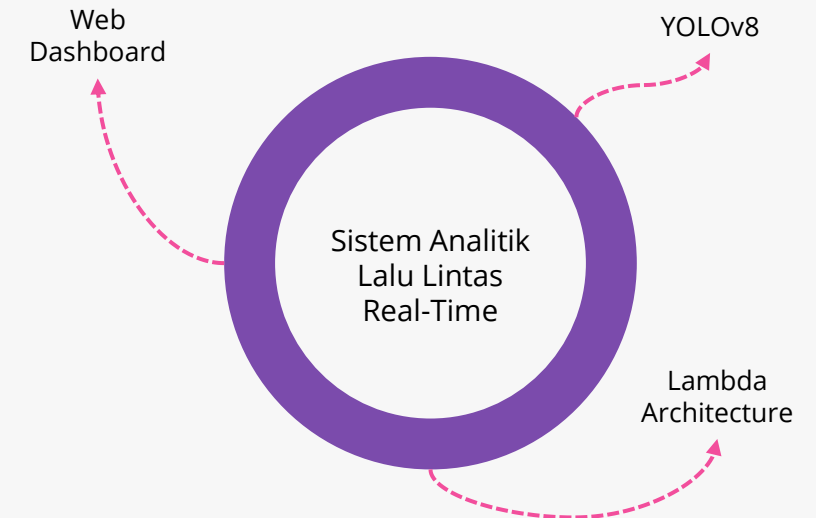

Hypothesis

Sistem analitik berbasis YOLOv8 dan Lambda Architecture mampu menghasilkan deteksi kondisi lalu lintas yang lebih akurat dan real time dibandingkan pemantauan manual

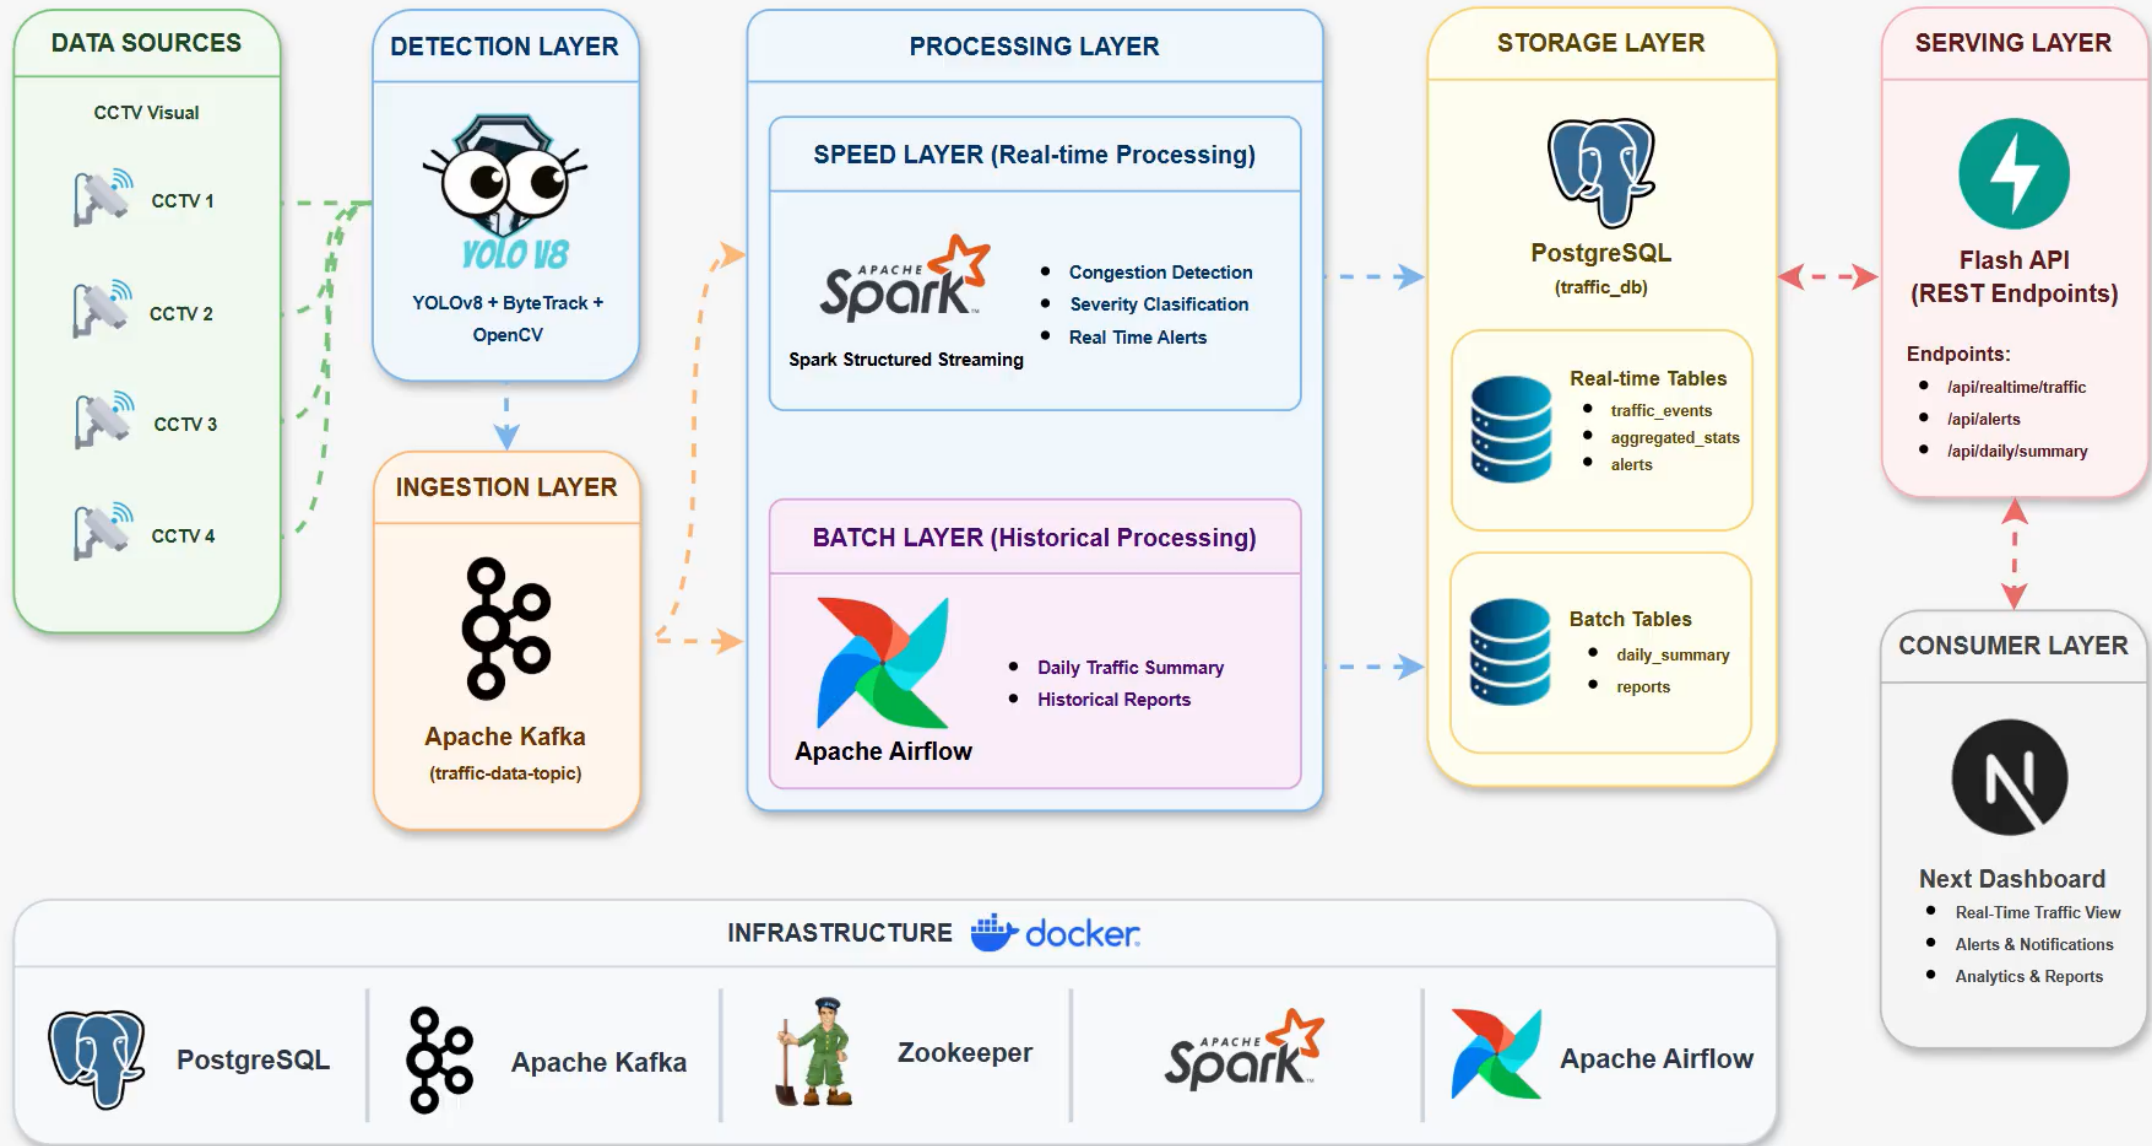

Methodology

- Planning & Requirement
- Data Collection & Model Training
- System Design (Lambda Arch)
- Development
- Testing
- Deploy

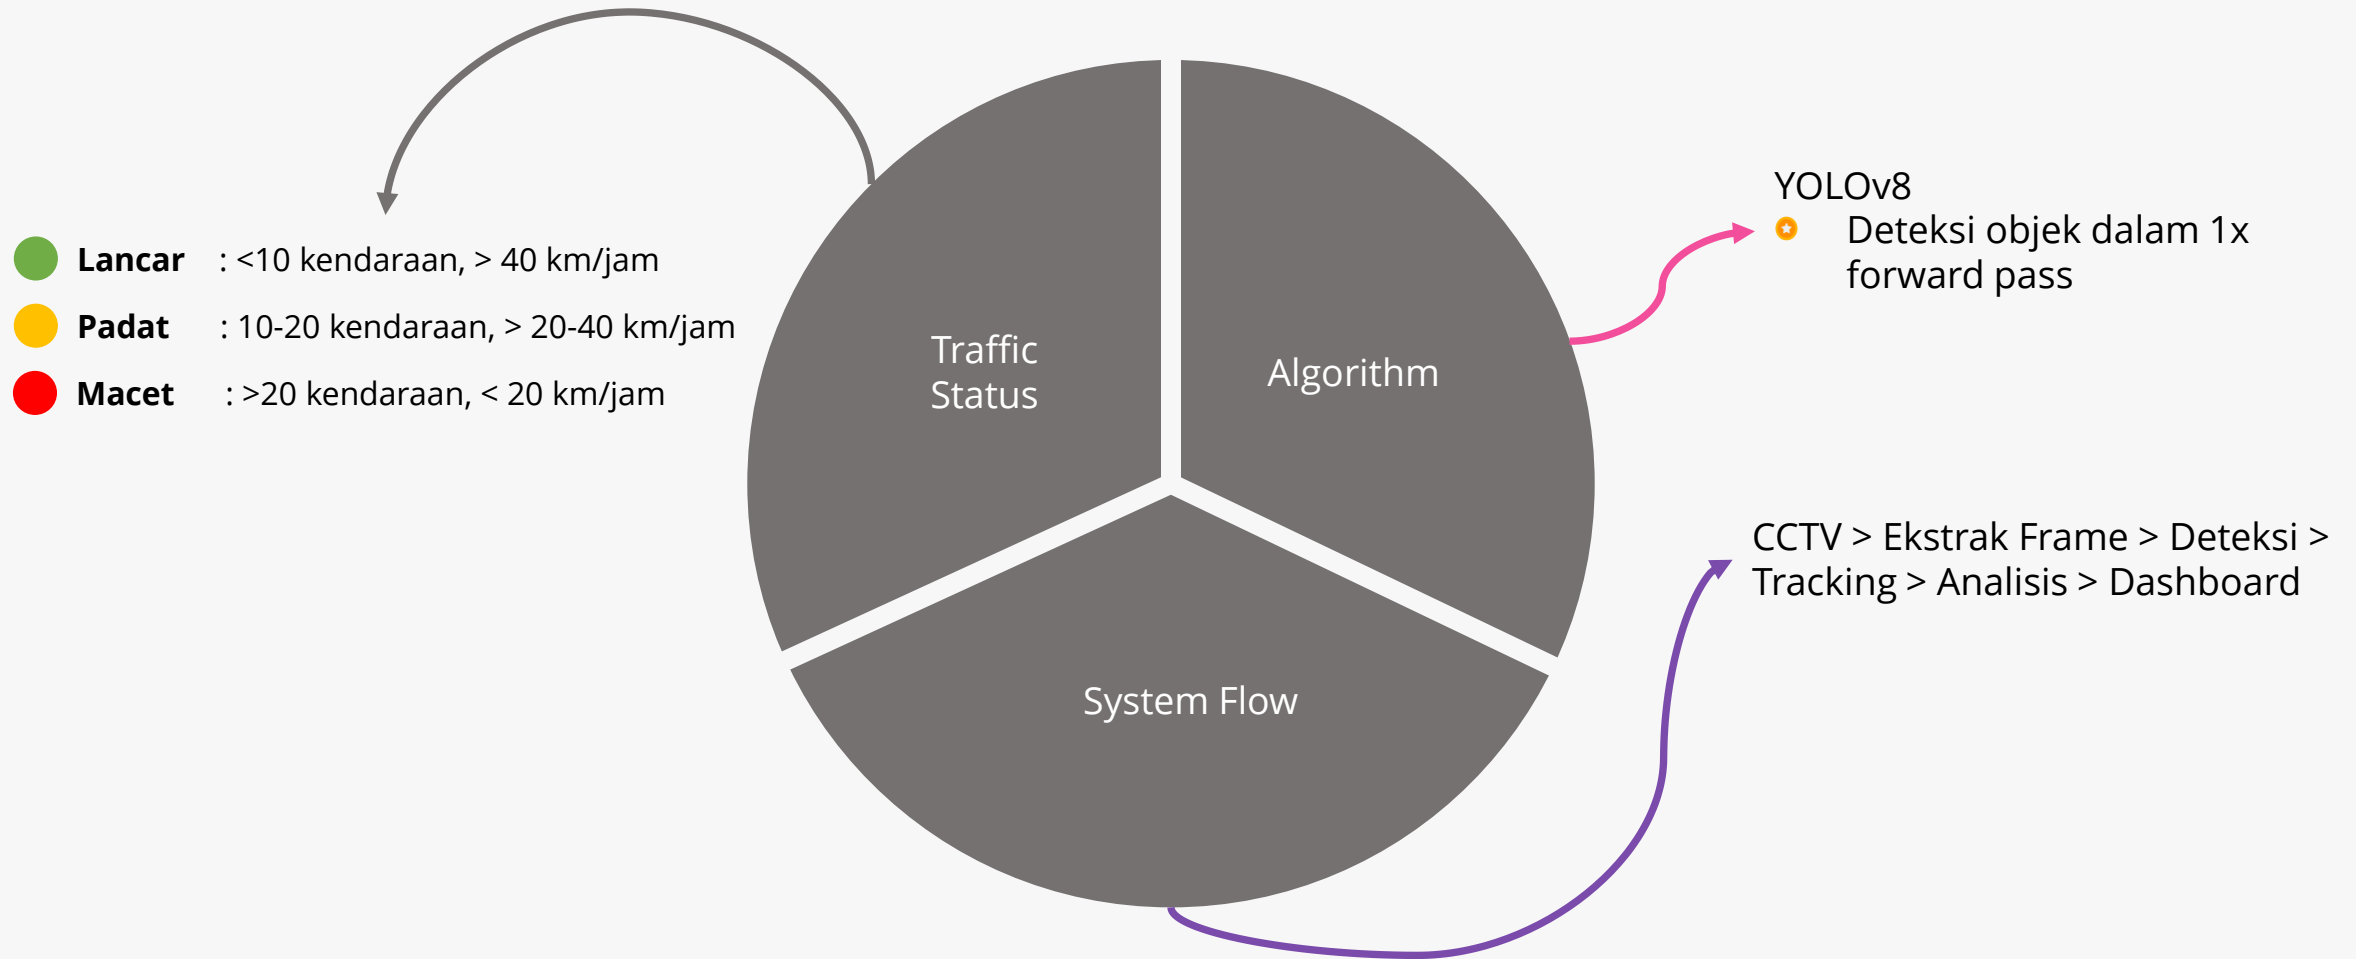

Proposed Solution

System Architecture & Tech Stack

Technical Explanation Algorithm
